

CONTINUING COMPETENCE PROGRAM

Completion of the Continuing Competence Program (CCP) is mandatory for each licensure year (see Bylaw V.1).

Designation(s) RN RN(AAP) NP

I have reviewed the Practice Standard(s) and indicators for my specific designation(s).

Yes No

Learning Plan

A minimum of one learning goal is required; however, it is recommended that you choose two or three. Complete for the highest role designation. If you practice in more than one category, you must include learning goal(s) and activities that relate to your primary role and where the learning will most positively impact your competence as a nurse. Indicate the Practice Standard(s) you will focus on this year.

[RN Practice Standards](#)

- Standard 1: Professional Responsibility and Accountability
- Standard 2: Knowledge-Based Practice
- Standard 3: Ethical Practice
- Standard 4: Service to the Public
- Standard 5: Self-Regulation

[RN with Additional Authorized \[RN\(AAP\)\] Practice Standards](#)

- Standard I: Professional Responsibility and Accountability
- Standard II: Knowledge-Based Practice
- Standard III: Ethical Practice
- Standard IV: Service to the Public
- Standard V: Self-Regulation

[NP Practice Standards](#)

- Standard 1: Professional Responsibility and Accountability
- Standard 2: Knowledge-Based Practice
- Standard 3: Ethical Practice
- Standard 4: Service to the Public
- Standard 5: Self-Regulation
- Standard 6: Therapeutic Management

What will your learning goal(s) focus be based on the Practice Standard(s) you have chosen for this licensure year?

I want to enhance my health promotion knowledge for client education on the Clinical Decision Tool for otitis media. I will do this by researching current evidence-informed research.

Add at least one (1) planned activity for each learning goal(s) you have chosen.

<u>Activity Type</u>	Activity Name	Target Date	Completion Date	In Progress/Carrying Over to Next Year's CCP
Research	Research current evidence-informed information	December - February	February 13	
Review best practice guidelines	Review Clinical Decision Tool for otitis media	February 20	February 25	
Identify tools to use in diagnosing	Identify evidence-informed tools to use in care of otitis media	January-February	February 22	
Collaborate	Discuss findings from research and cases with NPs/other AAPs to gain more knowledge	March-August	August	
Share knowledge on research	Present findings to my colleagues	September 22	September 22	

Evaluation Comments:

I chose to work on this goal as I see many clients in my practice who have recurrent otitis media. I felt this topic was important to provide my clients with more up-to-date and evidence-informed information on managing and treating otitis media. Completing research on new or improved treatment options allowed me to be more informed when making decisions about whether to/not treat with conventional methods. Collaborating with my colleagues also helped me discuss cases I may see in my practice and what they may do in their own settings, thus providing another means to discuss best practices. I was able to present my findings in a staff meeting to others I work with. Completing my learning goal allowed me to educate and provide care to my clients confidently.
